NOTES

I. Lomerío Chiquitano (Bésiro).

The obligatorily possessed nouns are quoted in the 3SG non-masculine form. The verbs that contain a verbal suffix are quoted inflected for 3SG non-masculine (in order to demonstrate the allomorph of the verbal suffix). Transitive verbs are cited with a 3SG non-masculine object suffix. The allomorph of 1SG subject is specified in the notes section for intransitive semantically active verbs.

The position of the stress is indicated in the transcription whenever this information is available or can be inferred from the morphology.

The nominal singular suffix $-\mathfrak{s}(i) / -s(e) / -\mathfrak{s}(i)$, whose final vowel is more often than not elided or devoiced, is represented as $-\mathfrak{s} / -s / -\mathfrak{s}$ {-xü / -se / -xhi} in the UTS.

The allophonic palatalization of p, t, k, m after i is transcribed as p^y, t^y, k^y, m^y {pi, ty, ki, mi}.

II. Porto Esperidião Chiquitano.

The lemmatization was carried out according to the principles outlined in the Lomerío Chiquitano section. The orthography currently in use by the Brazilian Chiquitano community was slightly modified in the cited forms: the accent is left unmarked and the allophones *ɪ*, *ʊ* are always represented as {e, o}. Major allophones (*p^y*, *t^y*, *k^y*, *ɪ*, *ʊ*) are

marked in the UTS. Other allophones (∂ , υ , ε , β) are represented with the characters (a , o , e , v), since they are in free variation with a , o , e , v respectively.

The consonant $ts \sim s$ is represented as UTS c , since the affricate realization (which alternates freely with [s]) seems to be more archaic. Although Santana [2012: 140] states that [ts] and [s] are allophones of the phoneme /s/ that occur in free variation in syllable onsets, this variation is not attested in all the words where it could be expected. Crucially, [ts] and [s] consistently contrast in the Migueleño variety of Chiquitano (own fieldwork carried out in San Juan de Lomerío), as well as in the variety of San Javier attested in colonial sources; the variation $ts \sim s$ is attested in Brazilian Chiquitano only the words that appear with an affricate in Chiquitano varieties where this segment is contrastive. This indicates that ts and s (UTS c and s) are distinct phonemes in Brazilian Chiquitano, even though the former can be optionally realized as [s].

Non-standard symbols and digraphs in the orthography are: \check{s} {ch}, \check{s} {rch}, \check{c} {tch}, n {nh}, i {ü}.

Porto Esperidiao Chiquitano: Santana 2012: 283. Only the 1SG *n=i=čⁱus₁* {nitchuse}, 3SG *t^yusⁱ-š ~ čⁱusⁱ-š* {tiusich ~ tchusich} are actually attested. Distinct from *n=ip^yai-š* {nipiaürch} 'female breast'.

12. BURN

Lomerio Chiquitano *ij_n=onoko-ta {iñonokota} (1).*

References and notes:

Lomerio Chiquitano: Galeote Tormo 1993: 338. The active verb *m=a=kiš_u-mu-nu* {makixumunu} (*ɲa*-class), glossed as 'to burn' in [Galeote Tormo 1993: 161, 348], is not attested in the existing Bésiro translations of the New Testament; its stative counterpart *kiš_u-βu ~ kiš_i-βu* {kixubu ~ kixibu} [Galeote Tormo 1993: 335; Krüsi & Krüsi 1975: 82] is attested in Revelation 16:8 ('the sun was allowed to **scorch** people with fire'), and its derivative *kiš_u-k^u-š* {kixukuxi} means 'sunburn' [Galeote Tormo 1993: 335]. All these facts suggest that *m=a=kiš_u-mu-nu* {makixumunu} is not the basic root for 'to burn' and means rather 'to scorch, to burn skin'. The verb *ij_n=onoko-ta* {iñonokota} is less frequent than *m=a=kiš_u-mu-nu* {makixumunu} in our sources but abounds in the existent Bésiro translations of the New Testament in verses like Luke 8:16, 15:8, Mark 4:21 ('to **light** a lamp'), Luke 3:17, Matthew 3:12 ('to **burn up** the chaff'), Revelation 17:16 ('to eat her flesh and **burn** her with fire'), James 3:5 ('is **set on fire** by a small spark'), Acts 19:19 ('**burned** them publicly'), Jews 13:11 ('for the bodies of those beasts, whose blood is brought into the sanctuary by the high priest for sin, are **burned** without the camp'). This is likely the basic root for 'to burn / to set on fire'. Distinct from *o(:)-mo* {o(o)mo} 'burnt' [Galeote Tormo 1993: 349; Sans 2010: 143; Krüsi & Krüsi 1975: 65]; *wi_ra-ra* {uirara} 'to burn (intransitive) / to become hot' [Galeote Tormo 1993: 358, 363].

Porto Esperidiao Chiquitano: Not attested. Cf. *ij_n=ōnok^o-ta* {inhonokota} 'to set on fire' [Santana 2012: 273], which is only attested as inchoative; *h^owra-ra* {hourara} 'to burn (intransitive)' [Santana 2012: 274]. The verbs *h^o-mv ~ =.o^o-mv* {homo ~ =oomo}, *kišⁱ-vv* {küchüvo} [Santana 2012: 288] are most likely intransitive.
